

KD3000 KUSTOM KOLOR FORMULA SYSTEM

The formulas listed under the swatches are listed by parts or percentage of KD3000 Series factory pack colors only. Complete formula information can be found on our website at www.houseofkolor.com. Now you can mix your color formula with 100% accuracy live online, both by Parts (per Volume) and by Weight (for scale mixing). This helps ensure that you never waste an ounce of product or valuable labor time in your shop by "eye-balling" your surfacer/sealer colors.

Choosing the right Shimrin2® color combinations for your Kustom Creation is only half of the custom paint experience. The right foundation color to enhance the depth and effect can quickly be realized by using our

new KD3000 Series Color Check Panel (part number HOK1052015). This massive 11 in. x 17 in. color check panel is filled with large color squares that represent all of our KD3000 Series factory pack colors, as well as some custom combination colors. We've even included smaller squares for airbrush artists to test color combinations with the beloved airbrush. Applying your Shimrin2® basecoats over this robust and vivid color check panel will allow you to clearly select the desired foundation color that best fits your creative style and pursuit of jaw dropping color!

KUSTOM DTS FOUNDATION

KD3000 SERIES KUSTOM DTS FOUNDATION SURFACER/SEALERS

What are the KD3000 Series Kustom DTS Foundation Surfacer/Sealers?

The foundation put under anything, a house, a sky scraper or a paint job is incredibly important. KD3000 Series Kustom DTS (Direct to Substrate) Foundation Surfacer/Sealer is a tri purpose product that can be used as a high or medium build primer surfacer, or as a sealer. It is formulated with a hybrid of epoxy and acrylic polymers, which provide excellent adhesion and corrosion resistance, productive dry times, and ease of sanding. These DTS surfacer/sealers emit very low amounts of Volatile Organic Compounds (VOCs), Hazardous Air Polluting Solvents (HAPS), and contain no isocyanides. The KD3000 Series DTS surfacer/sealers may be applied to the existing OEM finish, bare steel, aluminum, fiberglass, galvanized surfaces, and various plastics. Its tenacious adhesion, hi-build, excellent durability, and water and corrosion resistance and ease of sanding makes it a superior choice for the basis of a long lasting custom paint job.

KD3000 Series Kustom DTS Foundation Surfacer/Sealers:

- Resist cracking
- Direct to Substrate (DTS) eliminates the need for the additional steps and products required to achieve optimal adhesion and corrosion resistance.
- Cure as HB Surfacer for contour sanding in under 2 hours at 70°F
- Cure as Sealer for topcoating in under 30 minutes at 70°F
- Prevent plastic filler staining or bleed through
- Multiple colors greatly improves speed and accuracy of contour sanding when used as MB or MB Surfacer
- Application smoothness greatly reduces surface prep and consumption of abrasives
- Do not stain, shrink, or swell from sand scratches

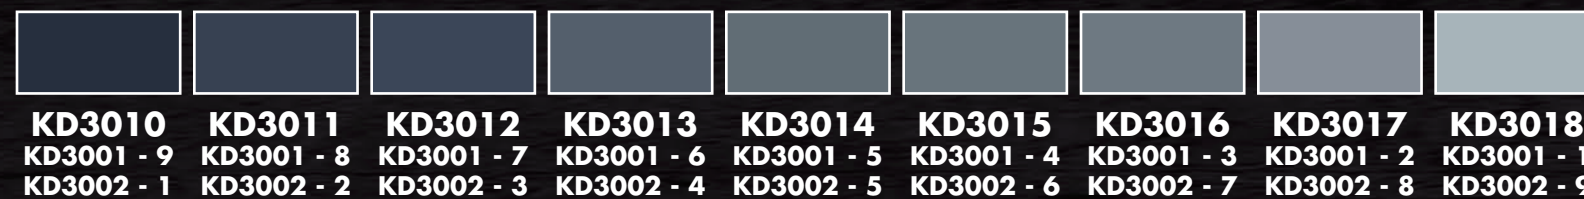

COMPONENTS:

KD3000.G01 Kustom DTS Foundation Surfacer/Sealer - Neutral Gray Gal.
 KD3000.Q01 Kustom DTS Foundation Surfacer/Sealer - Neutral Gray Qt.
